Groupe Lincora Inc. has been making lockers since the 1970s. One of our key objectives is to offer unlimited capabilities in the design of lockers for special projects, thus adding value both to your project and to our standard product lines.

We are a Canadian company based in Montreal. Our operations include 100,000 sq. ft. of manufacturing space.

Our mission is to provide you with a top-quality product along with the very best in service, at affordable prices.

Please contact us for all your locker needs.

www.lincora.com

At Lincora, we are constantly reviewing our processes and adjusting to today's demands. Our sensitivity to the needs of the architectural and interior design community has led us to develop a wide color selection to meet the demands of any project entrusted to us.

With a huge selection of options and configurations, Lincora lockers ensure both flexibility and superior solidity via an all-welded structure with a double-wall door.

To complement any configuration, sloping and recessed tops are available in all sizes. Our benches add extra value to the installation and come in various sizes. (Please refer to our technical specifications for detailed information.)

The Ventilated Locker

The Ventilated Locker

Very popular in gyms, pool dressing rooms, team rooms, etc., our super-ventilated 57 and 58 series are the answer to just about any special needs customers may have. The 57 or 58 series are factory-shipped with door, sides and back ventilated, but can also be made with just the 57 or 58 door mated to our standard 50 series sides and back.

If you have special ventilation requirements, our super-ventilated 58 series is sure to fit the bill. You can order them in any size to suit your special needs, and they can also be equipped with our available accessories, such as number plates, hooks, coatbars and extra shelves.

The Point-latching System

Our sensitivity to the need of customers has led us to develop our point latching system. This innovative system has won the approval of many architects and is a feature much appreciated by users. Available in single and double tiers, with a 3-point latch in the single-tier model and a 2-point latch in the double-tier model. Our three standard ventilation doors plus an extra ventilation door are available with these latch configurations. And of course, all our standard accessories such as hooks, extra shelving, coatbars and number plates can be integrated into this design.

- **We** offer the most rigid and vandal-resistant door in the industry, featuring a full-height door stiffener welded at the top and bottom door flanges.
- **Door mechanism** is of the finger lift control type, constructed of 12 gauge (minimum) steel with a nylon cover offering a generous finger pull.
- **Spring-activated** nylon slide latches are completely enclosed in the lock channel, allowing doors to close with the mechanism in locked position.
- **The locking device** is designed for use with either built-in key locks, combination locks or padlocks.
- **The 12-gauge latch hooks** securely welded to the vertical frame channel on the strike side engage the nylon slide latches. There are two latch hooks per door.

The Personal Security Locker

Custom-made Lockers

Single, double, triple or quadruple units are available, and each unit can have from 1 to 6 doors. All can be built to custom width, depth and height specifications. Doors are built with either a hasp for padlocks, integrated key locks or combination locks. We have the facilities to manufacture special sizes to suit your needs. And if you require any special gauge of steel, we can comply with your request.

Police lockers are one of our specialties. Our standard police locker is equipped with two doors. Single-door models are also available, however, depending on the width of the locker.

We can manufacture according to the individual police forces' requirements. Multiple configurations are available: with or without gun drawers, belt and tie holders--the possibilities are endless.

Width

We can manufacture your lockers to meet any special width requirement. Contact us for any information.

Depth

Need a special depth? We can fulfill all your requirements. Call us for more information.

Height

We can also build lockers to any custom height. Just let us know what you need.
